---

## Professional Summary

Master's student in Software Development at Boston University (expected graduation December 2025) with strong skills in software engineering, web development, and system design. Experienced in applying design patterns, refactoring, and building full-stack applications. Proven ability to work under pressure, adapt quickly, and deliver results in fast-paced environments. Seeking an entry-level software engineering role to contribute technical expertise and problem-solving skills to innovative teams.

---

## Education

**Boston University Metropolitan College** – Boston, MA

*Master of Science in Software Development*

(Expected Graduation: December 2025)

**ESGIS – Lome, Togo** – Licence en Management International

Foreign credential evaluated by WES and confirmed as equivalent to a **U.S. Bachelor's Degree B.A., International Management** – Completed 2021

---

## Technical Skills

- **Languages & Frameworks:** Java, Python, TypeScript, JavaScript, HTML5, CSS3, React, Spring Boot
- **Software Engineering:** Object-Oriented Design, Refactoring, Design Patterns (Factory, Singleton, Composite, Decorator, Observer, Strategy)

- **Web Development:** REST APIs, JSON, Asynchronous JavaScript, Frontend/Backend Integration
  - **Tools & Platforms:** Git/GitHub, VS Code, Netlify
  - **Other Skills:** Problem-Solving, Team Collaboration, Time Management, Adaptability
- 

## Projects

### Bank Application Refactoring

- Applied advanced refactoring techniques from Martin Fowler's catalog to improve code clarity, modularity, and maintainability.
- Optimized Account, Customer, Transaction, and TransferTransaction classes.

### Computer Science Department System

- Designed a system for student enrollment, waitlisting, and notifications using multiple design patterns.
- Implemented in Java with UML diagrams for system design.

### Inventory Management Web App

- Built a React application displaying grocery store products with dynamic routing, reusable components, and JSON integration.
- Implemented product detail pages with images, descriptions, and pricing.

### Asynchronous Web Application

- Created a drag-and-drop web app using JavaScript, HTML5, and CSS3, featuring asynchronous data fetching and dynamic UI updates.
- 

## Work Experience

### Burlington Stores, Dover, DE

*Receiving Associate* | [October 2023]

- Ensured efficient product intake and organization in a fast-paced environment.
- Demonstrated ability to work under pressure and meet daily productivity goals.

- Collaborated with team members to streamline workflows and maintain accuracy.
- 

## **Achievements & Strengths**

- Expected to graduate in December 2025
  - Strong foundation in software engineering principles and real-world application development
  - Quick learner with proven ability to adapt to new technologies and tools
  - Recognized for efficiency, teamwork, and strong work ethic
- 

## **Languages**

- English
- French
