

Kokoe Faith Fiawoo

Independent/ Junior Software developer

📍 Magnolia, DE, 19962 | ✉ Kokoe.faith@gmail.com | 🔗 www.linkedin.com/in/kokoe-fiawoo-b8369a1a1

PROFILE

I am a software developer with a background in international management and hands-on experience in software engineering projects. I am skilled in Python, Java, React, and scalable application development, with hands-on experience building frontend, and applying design patterns. Bilingual in English and French, with a global perspective and collaborative mindset. Seeking to contribute by applying my skills in building reliable, scalable, and high-performance software services

EDUCATION

Boston University — *M.S., in software development*

- Data Structures & Algorithms, Web Application Development, Artificial Intelligence, Information Structures with Python, Software Design and Patterns, Information Systems Analysis and Design

Bachelor of Business Administration in International Management

ESGIS, Lome, Togo

TECHNICAL SKILLS

- **Programming:** Python, Java, Javascript, SQL, TypeScript
- **Tools & Platforms:** Git, GitHub
- **Web Technologies:** HTML5, CSS3, React, TypeScript
- **Tools & Practices:** GitHub, VS Code, IntelliJ, Eclipse
- **Design & Architecture:** UML, Object-Oriented Design, Design Patterns (Factory, Singleton, Observer, Strategy, Composite, Decorator)

PROJECTS & EXPERIENCE

Burlington Stores, Dover, DE

Receiving Associate — October 2023- Present

- Ensured efficient product intake and organization in a fast-paced environment.
- Demonstrated ability to work under pressure and meet daily productivity goals.
- Collaborated with team members to streamline workflows and maintain accuracy.

Independent Software Engineer — 2024–Present

Weekly Meal Planner Application | Python project:

- Developed a command-line meal planning application in python that helps users plan weekly meals and discover recipes.
- Implemented feature to select meals from a menu or generate recipes based on available ingredients
- Used file handling to load recipe instructions from external text files and display step-by-step instructions
- Built a menu-driven interface to provide an interactive user experience.

Fruit Drag-and-Drop Game | JavaScript, HTML, CSS

- Developed an interactive drag-and-drop fruit sorting game using HTML, CSS, and JavaScript.
- Implemented drag-and-drop functionality and dynamic UI updates to enhance user interaction.
- Designed a responsive interface to create an engaging and interactive gameplay experience.

Personal Portfolio Website | React, TypeScript

- Developed a responsive personal portfolio website using React and TypeScript to showcase projects and skills.
- Implemented component-based architecture and client-side routing for smooth navigation.

- Designed a modern user interface with interactive elements and project highlights.

Natlang: Natural Language Emotion Analysis App | React, Python, Flask

- Developed a full-stack web application that analyzes customer complaints and detects emotional tone using the Google Gemini API.
- Built a React-based chat interface and a Flask backend API to process natural language inputs and generate empathetic responses.
- Implemented JSON-based communication between frontend and backend for real-time AI-generated replies.

Computer Science Department Management System | Java, UML

- Developed a Java-based academic management system to manage programs, courses, and student enrollment.
- Implemented course enrollment, waitlisting, automatic notifications, and GPA calculation features.
- Applied Object-Oriented Design and multiple design patterns and created UML class diagrams for system architecture.

OtakuLink Database Implementation | SQL, Database Design

- Designed and implemented a relational database system for the OtakuLink platform.
- Created database schemas, tables, and relationships to manage application data efficiently.
- Developed SQL queries to store, retrieve, and manage user and content information.

LANGUAGES

- English
- French

ADDITIONAL EXPERIENCE

- Transferable skills from International Management degree: project coordination, analytical thinking, cross-cultural collaboration.
- Familiar with AI-assisted coding tools (Copilot, Cursor) to accelerate development efficiency.
- Strong analytical and problem-solving skills
